Work Experience

Smart Systems Intern - *Applications Integration Team, Cortelluci Vaughan Hospital* — Vaughan, Jan 2021 - Present
- Helped with RTLS integration of patient beds and badges of healthcare workers
- Provided technical support for *Vocera* mobile app on nurses' smartphones
- Performed diagnostics and validation on patient iPad devices for proper data display and transfer

Project Experience

DsBnB – *Django, Gulp, SCSS, TailwindCSS, PostgreSQL, AWS EB* — Toronto, May 2021 – Present
- Ongoing clone-coding Airbnb project
- Incorporated the Django MTV model, proper routing, user and room editing, photo uploading, oAuth (local, GitHub, and Kakao authentication), RESTful APIs
- Styled the front-end with Gulp, Sass, and TailwindCSS

Guess-Mine – *NodeJS, ExpressJS, Gulp, PugJS, SCSS, Heroku* — Toronto, June 2020
- A simple online multiplayer game, where one user draws a word and others try to guess the word for points.
- Incorporated socketIO for online connection, gulp for building assets of the client side, and Heroku for deploying the app

WeTube – *NodeJS, ExpressJS, MongoDB, PugJS, SCSS, Heroku* — Toronto, May 2020
- Clone-coding YouTube project
- Incorporated the MVC model, proper routing, video uploading, oAuth (local, as well as Facebook and GitHub authentication), and RESTful APIs
- Used AWS S3 for cloud storage of media files, and deployed app through Heroku

Co-Curricular Activities

Attendee of Entrepreneurship and Intense Programming Camp — Daejeon, South Korea, June – July 2019
Korea Advanced Institute of Science and Technology (KAIST)
- Developed a prototype mobile app aimed to help KAIST students bookmark any `favourite` post from one of their school forums. Includes shortcuts to various websites used among KAIST students, such as course planner, academic calendar, etc
- Developed and designed the backend REST API using *expressJS* and *sequelize*. Utilized JWT for log-in authentication and *AWS* for running necessary server
